

Gauge Pressure Sensors

Rugged Stainless Steel Construction

DESCRIPTION

The durable PG/PV Series pressure transducers are ideal for a wide variety of HVAC/R and industrial applications, such as refrigeration measurement, pneumatic pressure measurement, gas pressure measurement, pump inlet, and outlet fluid pressure. They are even compatible with extreme applications, such as aerospace and motor sports equipment.

FEATURES

- Rugged stainless steel construction (PG and PV)
- No silicon oil, no internal O-rings, no welds...fewer parts to fail
- Sturdy construction...suitable for high shock and vibration applications
- A wide operating temperature range of -40° to 85°C (-40° to 185°F) for operation versatility

APPLICATIONS

- Pump inlet/outlet and compressors
- Hydraulic/pneumatic systems
- Energy & water management
- Refrigeration equipment, fluids
- Gas pressure measurement
