VERIS INDUSTRIES CO₂ DUCT SENSORS WIN IN ACHR NEWS 2006 DEALER DESIGN AWARDS

PORTLAND, Ore – July 6, 2006 – Veris Industries was recognized for excellence in product design in the third annual Dealer Design Awards Program sponsored by The Air Conditioning Heating & Refrigeration News magazine. An independent panel of 45 contractors acted as judges in the contest that had 112 entries from 75 manufactures. Veris' CO₂ Duct Sensors (CD Series) received the Bronze Award in the Indoor Air Quality category.

Veris Industries President Joanne Edwards said “We are honored to have our CO₂ Duct Mount Sensors recognized for what we strive to accomplish with all of our products...make an installer's job as quick and easy as possible.”

News Publisher John Conrad stated, “This product design competition gives us the opportunity to recognize the outstanding product designs and innovations that make a dealers job easier and faster. It also enables our readers to identify new product opportunities.”

The CD series duct mounted CO₂ sensors are designed for installation ease and serviceability:

- The transducer and duct probe are integrated in a single Nema 4 package eliminating the need for a pickup tube and the extra time to install it
- The duct probe is adjustable making it effortless to maximize air flow sampling
- The snap on housing cover requires no screws making installation and service a snap

Winning entries in the Dealer Design Awards will be featured in the July 17, 2006 issue of The News.

About Veris Industries

Veris Industries is a premier provider of energy and environmental sensor products, and is recognized for setting new standards in customer service and product innovation. For additional information on the CD Series, or any of Veris' industry leading products please call 1.800.354.8556 or send an email to sales@veris.com
